- ◆ Skills Practice
- ◆ Certificate of Participation

This is an introductory course in school counseling and provides online training in which individuals learn basic skills and enhance their knowledge base needed for being a school-based counselor.

The goal of the course is to train individuals to offer school counseling services as part of a comprehensive program that addresses the development of students in terms of academic/educational, career, personal/social and emotional skills, as well as school personnel, families, and the community at large.

The practice of counseling in school occurs regularly, and the training for this specific area has been largely lacking, thus this course is designed to address various aspects of being a school counselor.
